Sleman, Special Region of Yogyakarta, Indonesia

Industrial Engineering graduate with hands-on experience in engineering operations, HVAC maintenance coordination, inventory management, and technical administration in a hospital facility environment. Proficient in Microsoft Office, AutoCAD, Odoo ERP, preventive maintenance planning, and cross-functional coordination. Seeking to build a long-term career in engineering management, facility operations leadership, and operational excellence within the mall, hotel, property, and hospitality industries.

EXPERIENCE

CV. BERKAH CAHAYA LOGAM - Bantul, Yogyakarta, Indonesia May 2025 - Jun 2026
Field Administration & Maintenance Supervisor (Acting Assistant Operations Manager)

- Coordinated daily HVAC maintenance operations for hospital facilities by managing technician schedules, work priorities, and operational communication, ensuring uninterrupted engineering services throughout the contract period.
- Supported management decision-making by preparing maintenance reports, inventory records, procurement documentation, and operational updates for directors and hospital stakeholders.
- Streamlined coordination between hospital management, field technicians, and company leadership by serving as the primary operational liaison, reducing communication delays during maintenance activities.
- Monitored maintenance SOP implementation, work quality, and safety compliance across ongoing engineering activities to maintain operational reliability and service standards.
- Assisted senior management in planning workforce allocation, maintenance scheduling, and operational follow-up, strengthening day-to-day engineering administration and team coordination.

RSPAU Dr. S. Hardjolukito, Yogyakarta - Bantul, Yogyakarta, Indonesia Apr 2025 - May 2025
Industrial Internship – HVAC Safety & Maintenance Analysis

- Conducted field observations and prepared Job Safety Analysis (JSA) for HVAC maintenance activities, supporting workplace safety assessment for engineering operations.
- Identified operational hazards and proposed corrective actions to improve maintenance safety practices and reduce potential workplace risks.
- Assisted in documenting safety findings and maintenance observations used for engineering evaluation and continuous improvement.

Industrial Engineering Laboratory, Universitas Proklamasi 45 Yogyakarta - Sleman, Special Region of Yogyakarta, Indonesia Feb 2024 - Dec 2024
Laboratory Assistant – Production Planning & Facility Layout

- Assisted practical sessions in Production Planning and Inventory Control (PPIC) and Facility Layout Planning for undergraduate students.
- Supported laboratory operations, instructional activities, and technical preparation for academic engineering exercises.

EDUCATION

Universitas Proklamasi 45 Yogyakarta - Yogyakarta, Indonesia Jul 2022 - Jul 2026
Bachelor of Industrial Engineering, 3.84/4.00

- Graduated with excellent academic performance (GPA 3.84/4.00).
- Successfully completed undergraduate thesis defense in industrial engineering.
- Laboratory Assistant – Production Planning & Inventory Control (PPIC), 2025.
- Laboratory Assistant – Facility Layout Planning (PTLF), 2025.
- Active participant in engineering research and laboratory activities.

PROJECTS & PORTFOLIO

Hospital HVAC Maintenance Coordination Project - Yogyakarta Apr 2025 - May 2025

- Coordinated preventive maintenance scheduling, technician deployment, spare-part tracking, and maintenance reporting for hospital air-conditioning systems.
- Maintained operational records and maintenance documentation to support facility reliability and service continuity.

Undergraduate Thesis Research – DEM Simulation & Engineering Analysis | 2026 - Yogyakarta Feb 2026 - Jul 2026

- Conducted experimental testing and Discrete Element Method (DEM) simulation to analyze relaxed density behavior of charcoal briquettes under different screw extruder RPM conditions.
- Performed statistical analysis, engineering interpretation, and simulation validation to support process evaluation and operational decision-making.

- Contributed to the concept development of value-added waste processing equipment integrating shredding and extrusion technology.

SKILL & CERTIFICATION

- Hard Skills** (2026): HVAC Maintenance Coordination Engineering Operations & Facility Maintenance Preventive Maintenance Administration Inventory & Spare-Part Control Technical Documentation & Reporting Microsoft Office (Excel, Word, PowerPoint) AutoCAD Odoo ERP (Sales, Purchase, Manufacturing) Production Planning & Inventory Control (PPIC) Facility Layout Planning (PTLF) Occupational Health & Safety (SMK3 / HSE) EDEM Simulation
- Soft Skills** (2026): Leadership Team Coordination Problem Solving Communication Analytical Thinking Time Management Attention to Detail Adaptability Cross-functional Collaboration
- CERTIFICATION** (2026): BNSP Certified – Supply Chain Management (Production Management)
